

Draft Annual Report of the UC Davis Emeriti Association Video Records Committee Academic Year, 2015-16

June 9, 2016

Since our last report the video records committee has completed 17 interviews of emeriti, faculty or staff (details in table below). This number is only slightly larger than last year even though the committee has been expanded to ensure representation across the campus community (the current composition of the committee is detailed below

We have continued our efforts in collaboration with Academic Technical Services (ATS) in our effort to make all of our interviews accessible on the UC Davis Academic YouTube channel. During the past year we have collected and entered metadata to be uploaded with the videos. We are now just beginning our second upload tests of the 40 most recent interviews. As soon as we are satisfied with the results of processing the videos and metadata we will begin uploading the remainder of the interviews. The metadata for most of the 436 interviews has been entered. We will continue to try to obtain data for those for as many of those interviewees as possible, but at some point we will have to upload the remainder regardless of the completeness of the information.

This year we have endured a number of equipment and software challenges requiring a number of computer component and software upgrades or acquisitions.
